DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1, 2, and 90, drawn to a medicinal composition comprising ginseng or extracts or components or metabolites thereof.

Group II, claim(s) 81, drawn to a method for exploring novel active ingredients of using ginseng.

Group III, claim(s) s 64-67, drawn to a composition comprising ginsenoside Rb₁.

Group IV, claim(s) 74 and 91-93, drawn to dihydroginsenoside Rb₁ and a composition thereof.

Group V, claim(s) 88, drawn to a method for searching a novel compound having protective actions on brain cells using a component of ginseng.

Group VI, claim(s) 89, drawn to use of a component contained in ginseng for searching a compound having protective actions on brain cells or nerve cells.

Group VII, claim(s) 94-99, drawn to a method for treating a mammal suffering from a disease causing apoptosis, comprising administering the mammal ginseng or a component thereof.

Group VIII, claim(s) 100-103, drawn to a method for treating a mammal suffering from brain or nervous disorders comprising administration of ginseng or a component thereof.

Group VIII, claim(s) 104-107, drawn to a method for treating a mammal suffering from cardiac disease comprising administration of ginseng or a component thereof.

The inventions listed as Groups I-VIII do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The alleged 'special technical feature' is not novel over the prior art. Specifically, claim 1 recites a

Art Unit: 1654

composition comprising ginseng, a plant material which has been known in the art for thousands of years and is well documented in the prior art literature. Because ginseng was known in the art, the alleged special technical feature does not contribute over what was known in the prior art. Thus the claims do not have a special technical feature, and the claims are properly restrictable.

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows: ginseng, ginseng extracts, ginseng components and ginseng metabolites.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims

Art Unit: 1654

are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The claims are deemed to correspond to the species listed above in the following manner: 1, 2, 81, 88, 89, 90 and 94-10

The following claim(s) are generic: 1, 2, 81, 88, 89, 90 and 94-10.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: The species of 'ginseng' is not present in all of the 'ginseng components' or 'ginseng extracts'. Further, again, the species of ginseng is well known in the art and therefore does not correspond to a special technical feature.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
